Product Description

faytech's 7-10? touch monitors feature numerous detail enhancements including lockable standard connectors, unique rear cable routing and mounting frames for machine and wall mount integration. In addition, each model has a faster start-up time and response time due to our improved controller chipset.

The series retains its rich assortment of features such as: LED backlighting, 4-wire resistive touch panel, extra rugged components, extended power input (8-36 V), VGA+HDMI connectors, three video inputs, wall mounting, a high quality stand and an extended temperature range. The high-resolution support (e.g. 1080p, 1920×1200 pixels) of these faytech touch monitors makes them the perfect choice for a variety of applications.

For example, as a surveillance monitor in combination with an HTPC or with security cameras; as an operating panel in the industrial sector; in kiosk systems; as a cash register monitor or information terminal; for machine control; for home automation; for controlling wind turbines; for telematics in transport systems and in many other areas.
