📄 Product Description

The capacitive open frame touch monitors from faytech are the perfect choice for industrial and business applications. The 10-finger capacitive multi-touch panel offers a simple user experience for a wide range of applications. Each model in this series is designed for reliable and long-lasting operation by utilising an A+ quality LCD display with energy-efficient LED backlighting. It is equipped with a variety of standard connections, such as HDMI, DP, VGA, USB touch, serial and DC-in.This device features an optically bonded touch panel that improves stability, reduces reflection, increases viewing angle and enhances perceived brightness. It also provides resistance to dust particles and shows a better image in general. In addition, the open frames are very bright (1000 cm/d2), which ensures visibility in bright environments, while many sizes in this series also have a backlight life of 100k/hour, which guarantees a long product life cycle. This open frame version is a lightweight model that can be perfectly integrated into your own system or mounted in various locations using the clamp mount solutions.They are the perfect interactive solution for digital signage, classrooms, conference rooms, industrial automation, shopping centres, hotels and many other areas.
