18351 - Apple AirPods accessory set white

from **7,62 EUR**

Item no.: 372823
shipping weight: 0.10 kg
Manufacturer: Delock

Product Description

This accessory set by Delock offers 5-in-1 all-round protection for the Apple AirPods. It includes the protective case for the charging case, a retaining clip, two earplugs, a retaining strap and a snap hook. Practical protective case for Apple AirPods Charging case with snap hook This practical storage case protects the charging case from the weather, damage and dirt. Its elasticity also offers effective protection against knocks and scratches. The protective bag also has an opening for the charging port on the bottom so that the headphones can be charged without removing the charging case from the bag. The included carabiner makes it possible to attach the protective case to a belt or rucksack, for example. Retaining clip for Apple Watch strap The retaining clip is simply pushed through the watch strap and the headphones are inserted into the two round openings. This means they are securely stowed away and cannot get lost, e.g. when jogging. Thanks to the retaining clip, the AirPods are always ready to hand. Protective ear tips for AirPods The ultra-thin and flexible ear tips protect the AirPods from scratches, dirt and reduce ambient noise. They are also non-slip so that the headphones cannot fall out of the ear during sports, for example. Retaining strap for AirPods This retaining strap can simply be hung around the neck and ensures that the headphones are held securely in place during sports, for example. As soon as the AirPods slip out of the ear, they simply fall around the neck and not onto the floor. This prevents damage to the headphones.
