GSM Activate 4G Wireless PIR Alarm

from **168,62 EUR**

Item no.: 356934
shipping weight: 0.60 kg
Manufacturer: GSM Activate

Product Description

The GSM Portable PIR Alarm is a standalone small portable unit. It is suitable for indoor and outside installation. When the sensor is triggered by an intruder it will use the internal GSM technology to alert you. Therefore alerting you immediately to a problem you should be aware of! The unit requires a micro simcard to enable it to communicate with you. The alarm has a built in program which monitors the simcard and keeps it active. This means you will never have to worry about the simcard and unit being deactivated. Furthermore, we also offer this product compatible with either 2G or 3G. Customers can set up their GSM Portable PIR in a variety of places. Such as within their homes; workshops, sheds, boats, caravans, shops and endless other places where you need to safeguard the security of you, your family and your belongings. As we manufacture the GSM Portable PIR Alarm ourselves we can offer modifications to the unit to meet your requirements. If you need something different from this listing please contact us directly. Most of the times we can implement a simple program change at no extra cost. Our GSM Portable Alarm is made in the UK using the quadband GSM frequency therefore, enabling it to be used worldwide. With customers purchasing it all over Europe, Australia and the USA leaving great feedback.
