Product Description

Our GSM Door Contact Alarm system is a standalone alarm system. It is ideal for smaller rooms inside properties. By using GSM technology, when the door contact is broken the unit will send the user a text message and/or phone call to the users mobile phone or landline. Therefore, providing the occupier of the room instant notification when the room has been breached. The unit is housed in a perfectly weathered box enabling the unit to be installed outside as well as inside. Furthermore, the unit has been tested in high temperatures as well as freezing temperatures. Customers with questions regarding the product can contact us on the above numbers for more information.
