DSMCAM3UT801 - DSM, solution for driving safety and monitoring

from **380,17 EUR**

Item no.: 374118
shipping weight: 0.40 kg
Manufacturer: Teltonika

Product Description

The driver is immediately alerted with a beep if any of the built-in warning conditions are detected, such as drowsiness, yawning, distraction, smoking, talking on the phone or not wearing a seatbelt. With up to 128GB of data storage, extensive video is available to provide complete information about what happened before, during and after the events you care about. The small design provides a practical and effective solution for recording footage while driving - discreetly positioned in the A-pillar of the vehicle, it ensures the driver's forward view remains unobstructed. Get the requested photo or set up regular sending of images to the server to track and analyse events in real time and monitor visual data, such as images of events.

Specifications- Supported by: FMB640/FMC640- GNSS: Built-in (GPS, GLONASS, QZSS)- Dimensions: Camera: 48.7 mm x 56.18 mm x 78.52 mm / Main terminal box: 172 mm x 84.65 mm x 27 mm- Camera resolution: 720p@30fps, HDR- SD card: up to 128 GB micro SD card, 64 GB (supplied). 64 GB SD card Approximate recording time 24 hours- Infrared: 2x IR LED- Cable length: main cable 3.5 m "split cable"- Speaker/microphone: Yes- Power consumption: max. 8.4 W (12 V/24 V)- Operating temperature: -20 °C to +70 °C- LED display: Display (LED) Red/Green dual LED, operating status- USB: USB Type-C for calibration via PC- CAN: CAN 2.0 (option for DSM to detect speed via the CAN line)- RS232: TX/RX display (for communication with FMX640 devices)- Photo: With the FMX640 you can request a photo from the DSM or set the regular sending of images to the server- Fatigue: When the driver closes his eyes for a certain time.
