Product Description

This USB microphone from Delock can be used for voice and vocal transmissions.

Optimal recordingsThe microphone has a circular directional characteristic (omnidirectional) and thus captures sound ideally. Thanks to high performance, low self-noise and precise reproduction, even the finest sounds are optimally recorded.

Mute button & blue LED lightThe star-shaped mute button in the centre of the microphone can be used to quickly mute the microphone. In mute mode, the LEDs are switched off. In addition, the microphone has a switch on the side that can be used to deactivate or reactivate the LEDs.

Flexible gooseneckThanks to the gooseneck, the microphone can be bent in the desired direction.

Headphone outputThe microphone has a 3.5 mm jack output on the back for connecting headphones or speakers, for example.

Robust cableThe 1.5 m long USB cable has a braided sheath and a gold-plated USB plug and is therefore very robust and highly resistant to interference.

Plug & PlayThanks to USB Plug & Play, the microphone is ready to use immediately and no driver installation is necessary. The microphone works with all common operating systems such as Windows, Mac OS, Chrome OS and Linux.
