from **6,42 EUR**

Item no.: 372360
shipping weight: 0.10 kg
Manufacturer: Delock

Product Description

This audio splitter by Delock can be connected to a free jack socket of the MP3 player, mobile phone, tablet, notebook etc. and lead out two jack sockets. This allows two people to listen to the same music or take part in a video call via two headphones at the same time. The 4-pin connection on both audio sockets also supports the microphone function, provided the connected headphones have a microphone. Easy to use. The additional gold ring at the end of the plug means that this audio splitter can be easily connected to devices that are fitted with a protective cover. In addition, the 3.5 mm jack plug is angled so that the cable can also be connected in hard-to-reach places.
