from **3.234,32 EUR**

Item no.: 330495
shipping weight: 5.50 kg
Manufacturer: ADR AG

Product Description

CF Producer NG LOG 1 to 23 Duplicator

The new generation of ADR CF Cloners impresses through high copy speeds and compatibility with every CF card on the market. The NG Series allows you to quickly create higher numbers of exact copies of a master. Data accuracy is guaranteed through the "Copy & Compare" function which compares the copied cards to the master card on a bit-by-bit basis.

The CF cloner also offers an extensive quality check of your media with precise test results to help you weed out bad apples among card suppliers. Aside from its technical features the Standalone NG Series inspires with its user friendly interface and new compact design which doesn't just save space but it also simplifies the insertion of media.

With the new "Quick Socket-Technology" switching out single CF ports is now easier than ever before. Therefore the CF Producer is well-suited for very high throughputs. Quickly exchanging defective ports guarantees smooth production runs. All products of the NG Series are shipped with the "PC-Link" function. You can connect the duplicator to any PC via USB and monitor copy progress as well as bunch of other specs and infos such as size of the master, size of targets, write speed etc.

Features of the Copystation:

- Quick Data Copy - Only copies data which is located on the data carrier
- Copy + Compare - Reviews and compares the data after the copying process with the master
- Quality check of media to determine precise features of the media e.g. capacity, reading and writing speed
- High transmission rate - up to 1,5GB/min
- Supports DOD Erase function
- Standalone device. Functions fully on its own and merely needs a power source.
- User-friendly handling through self-explaining interface and a LCD display with 4 buttons.
- Exchangeable CF sockets
- Compact design
- Real-time information about latest actions on the LCD display
- Supports all current data formats, sizes and capacities of CF cards
- Transmits data synchronous as well as asynchronous
- You can also copy CFast cards with the optional CFast adapters

Specifications:

- Supported Media: CF Cards (other flash formats possible with adapter)
- Number of Slots: 1 Master - 23 Slaves
- Data Transfer Speed: Up to 66MB/s
- Copy Mode: Standalone - synchronous or asynchronous
