### Product Description

This high-quality High Speed HDMI cable from Delock is used to connect devices with HDMI interface, such as TV sets, Blu-ray players, monitors or beamers. Supporting a maximum bandwidth of 48 Gbps, it can play content with a resolution of up to 8K Ultra HD (7680 x 4320 @ 60 Hz).

The support of Dynamic HDR and Dolby® Vision makes the cable particularly suitable for use in home cinema and gaming. Colours are displayed realistically with impressive depth, and the brightness and contrast of the image are optimally reproduced.

The Delock HDMI cable supports Enhanced ARC (eARC for short). This means that HDMI devices such as UHD Blu-ray players can be connected directly to the TV, and the uncompressed audio signals are then transmitted directly and loss-free to the connected sound system via the audio return channel.
