## 62444 - Audio Converter Digital > Analogue

from **27,61 EUR**

Item no.: 373618  
shipping weight: 0.30 kg  
Manufacturer: Delock

### Product Description

The audio converter by Delock converts a digital audio signal into an analogue stereo signal. For example, a DVD or Blu-ray player can be connected to the input of the device and the signal can be fed in either optically via TOSLINK or via S/PDIF coaxial connection. At the output, the audio signal is sent to the analogue device via cinch.

Specification- Input: 1x TOSLINK socket S/PDIF, 1x coaxial socket S/PDIF, 1x DC power socket- Output: 2 x RCA socket- Supported sampling rates: 32 / 44.1 / 48 / 96 kHz- Robust metal housing- Dimensions (LxWxH): approx. 63 x 41 x 21 mmPower supply specification- Plug-in power supply- Input: AC 100 ~ 240 V / 50 ~ 60 Hz / 0.3 A- Output: 5 V / 1 A- External ground, internal positive- Internal dimensions: ø approx. 2.1 mm- External dimensions: ø approx. 5.5 mm- Length: approx. 9 mmSystem requirements- Digital audio signal- Connection cablePackage contents- Digital > Analogue converter- Power supply- Operating instructionsRevision note07/2018 New power supply
