from **19,20 EUR**

Item no.: 373429
shipping weight: 0.20 kg
Manufacturer: Delock

Product Description

This Delock jack 3.5 mm switch is a manual bidirectional switch for connecting different audio devices, which offers two different application possibilities. 1. Up to two devices with a jack connection, such as headphones, can be connected to one audio source. The device that is to play the audio signal can be selected at the touch of a button. (Simultaneous output to several devices is not possible) 2. Up to two devices with a jack connection, such as a PC, laptop or MP3 player, can be connected and headphones can be connected to the output. The device from which the audio signal is to be played back on the headphones can be selected at the touch of a button.
