shipping weight: 1.00 kg  
Manufacturer: RF Elements

## Product Description

The StarterDish antenna from RF Elements is a directional parabolic antenna with a gain of 24 dBi primarily intended for client installations. The antenna consists of a very light parabolic antenna, a simple holder for a mast with a diameter from 20 to 55 mm, a radiator is made of aluminum terminated on the back with a so-called IsoStation connector for direct connection to IsoStation or PrismStation units from Ubiquiti Networks. The antenna package also includes a reducer for connection to a C5x unit from Mimosa.

Wireless features- MIMO, SISO: 2 x 2- Polarization: VH- Wireless frequency: 5 GHz- Elevation beam width (-6dB) (°): 12- Azimuth beam width (-6dB) (°): 12- Antenna type: Directional- Antenna gain (dBi): 24Connectors and InterfacesRF connectors: IsoStation port, Twist-on port (Mimosa)Physical characteristicsDesigned for mast diameter (mm): 20 up to 55Wind load (km/h): 160Protection class: IP65Purpose: OutdoorOperating temperature (°C): -35 up to 55Weight (kg): 1,5Width (mm): 391Height (mm): 391Depth (mm): 196
