

Item no.: 358020

Cam 360 Full HD Camera

from **28,50 EUR**

Item no.: 358020
shipping weight: 0.50 kg
Manufacturer: Aeotec

Product Description

One look and you are at home. With the Aeotec Cam 360 full HD camera, you get a 360° view of your rooms at a glance. Get a detailed view of what's going on at home, day or night. Advanced object detection detects movement so you are alerted immediately. The cam distinguishes between people, living beings and objects.

Communicate with the SmartThings app via 2-way audio and a built-in microphone. Receive alerts when motion or sound is detected. Adjust the detection area to better target specific areas for unexpected activity. Plus, the SmartThings app guarantees you uninterrupted security.

Access your Aeotec Cam easily using Android (8.0 or higher) or iOS (11.0 or higher) devices. Sync your smartphone or tablet to get preview clips as soon as the cam detects motion. So you can keep an eye on what's important, even when you're not at home.

With cloud storage, you control up to four SmartThings cameras at once. Watch the latest footage from the last day for free. All your footage is stored securely in your personal cloud and can be accessed remotely at any time.

Use the SmartThings app to automate scenes and routines with compatible smart devices.
