

Item no.: 358077

Pipe sensor (1 m cable)

from **19,22 EUR**

Item no.: 358077
shipping weight: 0.50 kg
Manufacturer: Secure

Product Description

SES 002 and SES 003 are wired digital temperature sensors for measuring the surface temperature of hot water supply pipes and hot water tanks in central heating and hot water systems. Both SES 002 and SES 003 can only be used with the SES 302 temperature sensor or the SES 303 temperature and humidity sensor in a Z-Wave network and cannot be operated independently.

The supplied storage sensor housing fits over the pipe sensor housing for installation in hot water storage tanks. This measures the temperature of the hot water tank.

- Wired temperature sensor
- Only operable in conjunction with SES 302 and SES 303
