Indoor Sensor for Temperature and Humidity

from **59,62 EUR**

Item no.: 358076
shipping weight: 0.50 kg
Manufacturer: Secure

📄 Product Description

The SES303 indoor sensor is ideal for measuring temperature and humidity for intelligent central heating control or other similar applications. The user interface is kept simple and on the back the device is equipped with a push button and an LED. This makes it very easy to integrate the device into any Z-Wave network.
In addition to the standard functions, the SES302 optionally supports one of the following configurations:

- One external NTC wired temperature sensor (SES-001)
- Four external wired pipe/tank temperature sensors (SES002) (each connected by a 1m cable)
- One wired pipe/outside tank temperature sensor (SES003) (connected by a 4m cable)

- Temperature and humidity sensor for the interior
- Supports central heating control or similar Applications
- Local push-button, status LED
- Optional connection of external temperature sensors
- Power supply: 2x batteries (AA)
- Radio technology: Z-Wave Plus
