## Aeotec Button (Zigbee)

from **24,17 EUR**

Item no.: 358019  
shipping weight: 0.50 kg  
Manufacturer: Aeotec

### Product Description

Stylish design, simply attached. With a width of only 41mm, the Aeotec Button is hardly noticeable and blends in harmoniously everywhere thanks to its stylish design. Place the Aeotec Button on a flat surface or simply attach it to your refrigerator or wall.

At the touch of a button. The Aeotec Button allows you to control compatible lights, household appliances and other smart home devices at the touch of a button. You can assign multiple devices to the three assignable control gestures (tap once, tap twice, press and hold) to cover a wide range of uses. With your own preset scenarios, you can control your smart devices with a simple touch of a button.

Feel-good atmosphere in your home. From now on, you'll always know when the temperature in your home changes - your smart devices will take care of the rest. With the SmartThings app, you can see the temperature in real time and, with the help of your air conditioning, heating and other compatible smart devices, you can once again create a cosy atmosphere in your home.

Simply smart. Place the Aeotec Button in the exit area of your home and easily create a routine for leaving the house. When you leave the house, press the button and, with the compatible smart shutter control, lower the shutters or, with the compatible smart thermostats, reduce the heat output. Save precious time and energy with just one press of a button.

Important: To use all functions, you also need an Aeotec Smart Home Hub or other Zigbee Hub.

- Customisable functions: Tap once, tap twice, press and hold
