

Item no.: 358080

Strips Drip 700 Water/Temperature Sensor

from **47,61 EUR**

Item no.: 358080
shipping weight: 0.50 kg
Manufacturer: Sensative

Product Description

Place the Sensative Strips Drip 700 anywhere a leak could occur. With Z-Wave 700, you get advanced technology that gives you low-power communication, automatic energy management and long battery life. The ideal place for the strips is in hard-to-reach places, such as under a washing machine or even a sink. You receive early notification of leaking water and thus prevent expensive consequential damage. The integrated temperature sensor also warns you if an area is in danger of freezing. The specially developed battery lasts up to 10 years. That's practical, because you don't have to change or recharge batteries.

- Water leak detection
- Temperature monitoring
- Indoor or outdoor use
- Ultra-thin (3mm/0.11in) design
- Up to 10 years battery life
- Up to 100m range
- Easy to install
- SmartStart
- S2 Secure encryption
- Z-Wave 700
