24 V power adapter for LED Strip Controller

from **47,94 EUR**

Item no.: 358052
shipping weight: 0.50 kg
Manufacturer: Mean Well

Product Description

The 24 V power supply unit is suitable for use with the Gledopto LED Strip Controllers and LED strips. The power supply has an output power of 24 V and a maximum of 120 W. The power supply has a C13 (cold appliance plug) input and a P1M output plug (hollow plug) for the connection to the Zigbee LED controllers. For this purpose, a mains cable is included in the scope of delivery for connecting the power supply unit to an earthed socket.

This product is suitable for LED products that have an output of 120 W. E.g. an LED strip with 24 W/m can therefore be max. 5 m long. If the length of the LED strip exceeds this limit, we recommend using a second power supply unit to achieve the maximum light output.

- Input: 85-264 V AC
- Output voltage: 24 V DC
- Output power: max. 120 W
- Output current: 5 A
- C13 cold appliance plug input - Schuko (type F) to C13 mains cable included
- P1M output plug (hollow plug 5.5 mm)
