

Item no.: 358053

EnOcean Door Window Sensor

from **55,41 EUR**

Item no.: 358053
shipping weight: 0.50 kg
Manufacturer: NodOn

Product Description

The NodOn EnOcean door and window sensor allows the user to detect the open/closed state of an opening in real time. It reports the information to an actuator or home automation gateway to save energy.

- EnOcean door-window sensor
- No battery: the light fills the sensor with energy
- Quick installation
- Power source: solar panel (photovoltaic) for 3 days autonomy
- Autonomous operation: 100 lumens
- Maximum detection range when closed: 5 mm
- Wall mounting with adhesive tape (supplied) or screws (not supplied)
- First use without battery requires <10 minutes of light exposure
- Optional CR1216 battery (not included) for use in dark areas
- Autonomy in total darkness: 3 years
- Pairing button on the back of the sensor
- Radio frequency range: 868.0 to 868.6 MHz
- Range: up to 30 m indoors
- EEP (EnOcean profile): D5-00-01
