LED_3161-40K - LED strip light warm white - 4000 Kelvin

from **50,88 EUR**

Item no.: 358044
shipping weight: 0.50 kg
Manufacturer: LED-Trading

Product Description

24 volt strip light with single-colour 4000K COB LED.

With this LED strip light, the individual LED chips are hidden by COB technology to ensure uniform illumination of the strip. The strip is equipped with 320 LED/m, so that a homogeneous light strip is created on the entire strip. For this reason, COB strip lights are ideal in areas where the LED strip light cannot be hidden.

This LED strip can be connected to the following control unit:

- Control unit for single-colour LED strip (Zigbee)

Notes on COB LED strips: The COB LEDs can be separated every 50 mm and extended/connected with a 2-pole cable. For this purpose, you need a 24 V DC transformer and, if required, a dimmer (PWM).

- Light colour: Warm white
- Voltage: 24 volts DC (no power supply included)
- Protection class: IP20
- Power consumption: 60.00 Watt
- Lumen: 6000 lm
- Light output per metre: 1200 lm/m
- Light output: 100 lm/W
- Power: 12 W/m
- Colour temperature: 4000 Kelvin
- Average life: 50000 hours
- Colour rendering index: Ra 90
- Switch-on time: Less than 1 second
- Length: 5000 mm
