

Item no.: 358061

Danapad for Danalock V3

from **112,28 EUR**

Item no.: 358061
shipping weight: 0.50 kg
Manufacturer: Danalock

Product Description

With the Danalock Danapad for the smart door lock Danalock V3, access authorisations can also be assigned to guests who neither use a smartphone nor a physical key. The owner of the lock simply generates up to 20 number codes in his app and thus assigns time-limited, recurring or permanent authorisations to open and close the Danalock V3 to other users.

The Danapad is battery-powered and weatherproof, so it can be positioned anywhere near the front door and within Bluetooth range of the door lock. It can be screwed to the wall or attached with adhesive pads.

Features:

- Danapad keypad to complement the Danalock V3 smart door lock
- Allows the Danalock V3 to be opened and closed without a smartphone, simply via an individual code
- Ideally suited for children, elderly people and guests who do not use a physical key or smartphone
- Owner can set up and assign up to 20 codes to users
- Character length of the numeric codes: 4-10
- Communication with a Danalock V3 via Bluetooth 4.0
- Weatherproof and battery-operated: 4 AAA batteries
- Can be screwed or glued to the wall
