Product Description

With this Qi-certified charging station by Delock, a smartphone and another device can be charged wirelessly at the same time. Induction energy transfer eliminates the need for charging cables and protects the connectors. The charger supports fast charging up to 15 watts for appropriately equipped smartphones. Charging surface for headphones The charging surface in the base of the station offers an output of up to 5 W and is suitable for devices that support inductive charging with lower output, for example wireless headphone cases.
