Manufacturer: MikroTik **Product Description**

wAP LTE kit is a tiny weatherproof wireless access point for installation outside your house, in the garden, on your porch, or in any other challenging environment where you need a capable wireless connection on the tightest budget possible. It features an Ethernet port with passive PoE-in, but there are more ways to power this affordable access point: there's also a standard DC jack and an automotive plug. The new revision features a new LTE modem that offers improved connectivity, the addition of the popular B28 band, and a massive price drop! wAP LTE kit is weatherproof and can be fixed to any external wall from the inside of the case – for extra security and less visible attachments. The bottom part can also be secured with a special anti-vandal screw, which can only be opened by the owner. There is an opening in the back of the case, allowing you to run the Ethernet cable directly behind the unit and through the wall. This way the wAP attracts less attention and blends into any environment.
