BPI: BIT BREADBOARD GPIO - Banana Pi - GPIO Expansion Board, extension module

from **5,74 EUR**

Item no.: 331234
shipping weight: 0.10 kg
Manufacturer: BPI

Product Description

BPI:Bit Breadboard - GPIO Expansion Board

The BPI:Bit breadboard belongs to the GPIO expansion boards and is therefore an extension module. GPIO (General Purpose Input/Output) is a general purpose pin on an integrated circuit whose behavior, whether used as input or output contact, is freely definable by logical programming. Thus, these contacts have no purpose, are therefore unassigned and can therefore be used by the user in many ways.

This board is only applicable for BPI:Bit.
