

Item no.: 382218 MCE25 -

Product Description

The main purpose of the Maclean MCE25 sensor is the automatic control of lighting, but it is also possible to connect other electrical devices (e.g. electric heaters, air conditioners, etc.), provided that the power receiver does not load the switch with more than 1200 W (resistive load) or 300 W (inductive load).

Technical data- Operating voltage: ~220-240V/50Hz- Maximum power: 1200W (resistive load) / 300W (inductive load)- Detection angle: 180°- Light sensitivity setting: 3-2000LUX (adjustable)- Detection range: 5-12m (adjustable) (<24 °C)- Operating temperature: -20~+40°C- Operating humidity: <93%RH- Sensor: PIR detector (infrared)- Protection class: IP44 (waterproof)- Mounting height: 1.8m-2.5m- Motion detection speed: 0.6-1.5m/s- Power consumption: approx. 0.5W- Adjustable light duration: from 10sec to 7min- Colour: white
