Product Description

High-quality, energy-saving 4W LED light bulb with a socket with E14 thread. It is equivalent to a normal 35W light bulb. The high efficiency makes it possible to reduce energy consumption by up to 80%. Our LED bulbs are the best ecological alternative. The advantage of the incandescent bulb is the use of LED modules that resemble a traditional filament. This makes the bulb similar in appearance to a classic light bulb and is ideal for use in various types of chandeliers and wall lights.
