Product Description

EdgeRouter ER-X-SFP-EU 6-Port introduces the EdgeRouter(TM) X, part of the EdgeMAX platform. The EdgeRouter X combines carrierclass reliability with excellent pricetoperformance value in an ultracompact form factor.

PoE VersatilityTwo models of the EdgeRouter X are available. The standard model, the ERX, can be powered by an external power adapter or 24V passive PoE input. A passive PoE passthrough option is available to support a single airMAX device. The SFP model, the ERXSFP, is powered by an external power adapter. The five Gigabit RJ45 ports support 24V passive PoE output for airMAX or UniFi devices, while its SFP port provides fiber connectivity to support backhaul applications.

Configuration MethodsPowered by a proprietary and intuitive graphical interface, EdgeOS(TM), every EdgeRouter X can easily be configured for the routing, security, and management features required to efficiently run your network. For advanced network professionals, an integrated CLI is available for quick and direct access using familiar

Intuitive User InterfaceThe EdgeRouter X provides a graphical user interface designed for convenient setup and control. Accessed via a network port and web browser, the userfriendly interface provides intuitive management with a virtual view of the ports, displaying physical connectivity, speed, and status. The Dashboard displays detailed statistics: IP information, MTU, transmit and receive speeds, and status for each physical and virtual interface.

Powerful FeaturesEdgeOS is a sophisticated operating system with robust features, including:

- VLAN interfaces for network segmentation
- Static routes and support of routing protocols: OSPF, RIP, and BGP
 Firewall policies and NAT rules

- DHCP services
 Quality of Service (QoS)
