Product Description

Ubiquiti UBB - 60 GHz Gigabit+ Wireless Bridge Kit

The UniFi Building-to-Building Bridge, model UBB, is the ideal solution for highthroughput connectivity with a range of up to 500 m. Integration with the UniFi Network application makes bridging two networks seamless.

Comprised of two pre-paired endpoint devices, the UBB delivers a Point-to-Point (PtP) link – up to 1+ Gbps – using 802.11ad technology on the lowinterference 60 GHz radio band. For backup, a 5 GHz radio using 802.11ac technology is available.
