Product Description

Optical cable from the renowned company Maclean model MCTV-451. One of the main advantages of this model is reinforced metal plugs, which provides cables of this line with unprecedented durability on the market. The cable is not only durable but very flexible. The cable was developed to meet the strictest technical requirements and to satisfy the most discerning audiophiles, and at the same time to surprise with an excellent design. Maclean cables provide lossless signal transmission for the purest and most realistic sound effects. Maclean optical cable is especially recommended for high-quality digital connections - whether it be a satellite receiver, blu-ray player, game console or other modern entertainment equipment. The cable is ideal for connecting, for example, a CD/SACD/Blu-ray/DVD/TV/SAT player or a computer/console to a home theater receiver to transmit a digital audio signal. By connecting your home theater with our cable, you will get 5.1 or 7.1 surround sound. It is the most technologically advanced cable on the market today! High quality guaranteed by a reputable manufacturer. Connecting multimedia devices to your home theater receiver with this cable, you can get digital effects: Dolby Digital, Dolby ProLogic, Dolby Surround, DTS, etc. Specification- Manufacturer: Maclean- Model: MCTV-451- Length: 1m- Connector: Toslink T-T- Ultra thin and flexible cable (only 4mm)- Cable made of the highest quality bend-resistant fiber optic cable- Narrow cable for increased convenience and mobility- Metal connectors have been plated with 24 karat gold for the best contact with the sockets in your equipment- Provides lossless transmission of uncompressed signal- Highly precise and robust manufacturing- 99.99% immunity to EMI interference- Meets CE standards Set includes- Maclean MCTV-451 Toslink T-T optical cable 1m- Manufacturer's packaging- Proof of purchase Maclean is a global market leader in specialized cables, accessories for home theater, hi-fi systems and PC connections.
