

Item no.: 277197

Professional high-speed WLAN antenna set, 9 dBi, RP-TNC connectionfrom **20,16 EUR**Item no.: 277197
shipping weight: 0.14 kg
Manufacturer: VARIA Group**Product Description**

Professional high-speed WLAN antenna set for 802.11b/g, indoor, 2-pack With these antennas you can increase both the strength of outgoing signals and the reception sensitivity for incoming signals. The greater signal strength and increased reception sensitivity improve the reliability of short-range communications as signals are received clearly and distinctly, reducing retransmissions due to poor signal reception. The high-performance antennas are particularly suitable for wireless networks in businesses and the home, as they can receive strong signals even in remote and hard-to-reach areas. They are also ideal for large areas such as warehouses, public spaces, wireless hotspots and outdoor spaces - wherever you need a larger reception area for your wireless network. Functions: - amplification of the radio signal from your wireless devices (2.4 GHz) - omnidirectional operation (reception in a 360 degree range) easy to install, no configuration required - signal amplification: 9 dBi - frequency range: 2.4 GHz - 2.5 GHz - Polarisation: linear/vertical - Direction: omnidirectional - Nominal impedance: 50 ohm - Connector: RP-TNC - Dimensions: 15 mm x 380 mm - Weight: 62 g - Colour: black - Operating temperature: -20 °C to 60 °C - Storage temperature: -30 °C to 75 °C - Operating humidity: 0 % to 85 % (non-condensing)
