ARS-N19CW - 2.4 GHz 9 dBi omni antenna, N plug connection

from **10,95 EUR**

Item no.: 313365
shipping weight: 0.10 kg
Manufacturer: ALFA Network

Product Description

ALFA Network ARS-N19CW - 2.4 GHz 9 dBi antenna with N-connector (reverse polarity) This high-performance antenna allows you to increase both the strength of outgoing signals and the reception sensitivity for incoming signals. The greater signal strength and increased reception sensitivity improve the reliability of short-range communications as the signals are received clearly and distinctly, reducing retransmissions due to poor signal reception. The professional high-performance antenna is particularly suitable for receiving strong signals even in remote and hard-to-reach areas. It is also ideal for large areas such as warehouses, public spaces, wireless hotspots and outdoor spaces - wherever you need a larger reception area for your wireless network. Functions- Amplifies the radio signal of your wireless devices (2.4 GHz)- Omni-directional operation (reception in a 360 degree range)- Easy to install, no configuration required!!! Compatible with All wireless devices that have an N connector. Please ensure that your wireless LAN device has a compatible N connector (male/female).- Model: ARS-N19CW- Frequency range: 2400 - 2500 MHz- Gain: 9.3 dBi- VSWR: <= 1.6:1 max.- Polarisation: Linear, vertical- Impedance: 50 Ohm- Connection: N-connector- Temperature: -10°C to +55°C- Humidity: 95% (at) 55°C
