Product Description

W73P - Basic DECT IP Phone System

Combining the dedicated DECT handset W73H and the powerful base station W70B, Yealink W73P is a new cordless IP phone system with high performance and optimized user experience for enhancing productivity in mobile working and wireless communication.

Yealink's new W73P embraces upgraded hardware, acoustic algorithm, as well as enhanced computing capacity and signal strength, providing faster response and HD audio with exceptional clarity and stability even in poor network conditions. And especially for the workers of complex environments, the system also delivers noise-free conversations with larger volume. In addition, the power efficiency and battery life are improved for amplifying flexibility and mobility by supporting up to 35 hours talk time and 400 hours standby.

Supporting registration with up to 10 Yealink W73H DECT handsets, the W73P system is launched with robust processing capacity for up to 10 SIP accounts and 20 simultaneous calls. More flexibility and mobility could be enabled through up to 6 optional repeaters for extended network coverage.
