Product Description

Wireless Instruments WiBOX PA M5-24X - PTFE laminate MIMO 2x2 antenna, X-pol, 5.15 - 5.95 GHz

WiBOX PA M5-24X is an innovative PTFE microstrip dual polarity X (slant) polarized (MIMO 2x2) planar antenna operating in the frequency range of 5,1 – 5,95 GHz with 24 dBi gain in both polarizations. It is recommended for point-to-point (PTP) or point-to-multipoint (PMP) links as the client antenna, where high-gain antennas are required. Due to the slant (+/-45 deg) polarization, PA M5-24X can be used in interfered environments and works with WLAN 802.11n/ac systems. It can be installed indoors and outdoors (IP67). The antenna is integrated in the top quality WiBOX Large box system.
