

Item no.: 382715

42510 - A-OMNI-0914-V1-02 Narwhal 5GLTE Omnidirectional 4x4 MIMO Marine

from **2.227,76 EUR**

Item no.: 382715
shipping weight: 0.10 kg
Manufacturer: Poynting

Product Description

Poynting A-OMNI-0914-V1-02 "Narwhal" 5G/LTE Omnidirectional, 4x4 MIMO marine and coastal antenna with high gain; 617 - 4200 MHz, BAND71 compatible. The Narwhal series has been specially developed for marine and coastal applications. The mobile antennas have ultra-wideband coverage and operate from 617 to 4200 MHz, covering the current 5G/LTE bands for mobile communications. The Narwhal series will offer a variety of antenna configurations with 5G/LTE or Wi-Fi antennas that can range from SISO to 2x2 to 4x4 MIMO. Thanks to IP68, the antenna is protected against the ingress of water. This makes it ideal for unfavourable weather conditions at sea. The antenna housing consists of a fibreglass housing and a 316 stainless steel base and cover. This makes the antenna fully salt water protected and suitable for use in highly corrosive environments, including chemical and toxic environments. **HIGHLIGHTS-** Frequency band: 617 - 4200 MHz- Peak gain: 8dBi- MIMO: SISO, 2x2 or 4x4 MIMO in various combinations- Radome material: Fibreglass, which is used for our marine antennas and is more resistant to UV radiation and offers protection against chemicals and salt water.- Radome colour: Brilliant antique stainless steel. Radome colour: Brilliant white (as with our marine antennas)- BAND71 compatible **SUPPLIES-** Antenna- 2 m long HDF-195 cable with N-type plugs (sockets)- BRKT-90 for mast and wall mounting
