shipping weight: 2.50 kg
Manufacturer: Four-Faith

Product Description

Four-Faith 5G industrial CPE F-NR200- Four-Faith's F-NR200 is a 5G industrial CPE. It plays the role of transmitting wireless long-distance data through public networks in IoT-applied solutions and other smart interactive scenarios.- The F-NR200 5G CPE adopts industrial-grade designs, including an industrial 32-bit processor and wireless module, and with a watchdog system, which makes it suitable for industrial use and capable of keeping its stable operation even in harsh industrial environments.- With standard ports including RS232 and RS485, the F-NR200 5G CPE has the capacity to connect different devices simultaneously for wireless data transmission.- The F-NR200 5G CPE has been widely used in the M2M field of the IoT industry chain, such as smart factories, smart transportation, and environmental protection, etc.- Dual-band: 2.4Ghz & 5.8Ghz- Outer shell: metal, IP68 waterproof and dust-proof protection- Standard ports: RS232 & RS485, Ethernet WAN (LAN), Wi-Fi- CPU: industrial-grade 32-bit processor & wireless module- System: watchdog design, complete mechanism, stable operation- Applied scenarios: M2M fields of the IoT industry, smart factories, etc.
