## F-NR120 - 5G DUAL SIM INDOOR CPE Router Dual SIM 1LAN 1WAN1RS232RS485 1CAN PORT

from **432,26 EUR**

Item no.: 384993  
shipping weight: 0.50 kg  
Manufacturer: Four-Faith

### Product Description

Four-Faith F-NR120 5G SIM Wifi Router- Four-Faith's F-NR120 is an IoT wireless communication router. It plays the role of transmitting wireless long-distance data through public networks in IoT-applied solutions and other smart interactive scenarios.- The F-NR120 router adopts industrial-grade designs, including an industrial 32-bit processor and wireless module, and with a watchdog system, which makes it suitable for industrial use and capable of keeping its stable operation even in harsh environments.- With standard ports including RS232 and RS485, the F-NR120 router has the capacity to connect different devices simultaneously for wireless data transmission.- The F-NR120 router has been widely used in the M2M field of the IoT industry chain, such as smart grids, smart cities, transportation, and environmental protection, etc.- Dual-band: 2.4Ghz & 5.8Ghz- Outer shell: metal, IP30 waterproof and dust-proof protection- Standard ports: RS232, RS485, Ethernet WAN ( LAN), Wi-Fi- CPU: industrial-grade 32-bit processor & wireless module- System: watchdog design, complete mechanism, stable operation- Applied scenarios: M2M fields of the IoT industry, smart factories, etc.
