Item no.: 384992

F-NR100 - 5G Router Single SIM 4LAN 1WAN1RS232RS485 WiFi TF card Housing Iron,

from **420,14 EUR**

Item no.: 384992
shipping weight: 1.00 kg
Manufacturer: Four-Faith

📄 Product Description

Four-Faith F-NR100 industrial dual-band router- Four-Faith's F-NR100 is an IoT wireless communication router. It plays the role of transmitting long-distance wireless data through public networks in IoT-applied solutions and other smart interactive scenarios.- The F-NR100 router adopts industrial-grade designs, including an industrial 32-bit processor and wireless module, and with a watchdog system, which makes it suitable for industrial use and capable of keeping its stable operation even in harsh environments.- With standard IoT ports including RS232 and RS485, the F-NR100 industrial router has the capacity to connect multiple devices simultaneously for wireless data transmission.- The F-NR100 industrial router has been widely used in the M2M field of the IoT industry chain, such as smart grids, smart transportation, and environmental protection, etc.- Dual-band: 2.4Ghz & 5.8Ghz- Outer shell: metal, IP30 waterproof and dust-proof protection- Standard ports: RS232, RS485, Ethernet WAN (LAN), Wi-Fi- CPU: industrial-grade 32-bit processor & wireless module- System: watchdog design, complete mechanism, stable operation- Applied scenarios: M2M fields of the IoT industry, smart factories, etc.
