

Item no.: 389642

EKASFP2F - SFP module adapter for EKA1000.., 2 fibres

from **104,27 EUR**

Item no.: 389642
shipping weight: 0.10 kg
Manufacturer: Televes

Product Description

SFP (Small Form-Factor Pluggable) transceiver module for 1000 Base-X with LC connector, offering the possibility to extend the network up to 10 km through single-mode (SM) fibre. This powerful media adapter can be connected to an Ethernet input of a CoaxData device to enable its access to an Ethernet signal through optical fibre. Highlights- SFP (Small Form Pluggable) module- 2 single-mode fibres (SM)- Operating data rate of 1250 Mbps- Duplex LC connector- Up to 10 km transmission distance- LVPECL inputs and outputs- TTL signal detection indicator- Hot-pluggable- Support of WaveData access points with Art. No. WAVEDATAS- Support of CoaxData modem with Art. No. EKA1000SFP Good to know What is an SFP? The Small Form-Factor Pluggable (SFP) devices are adapters that create an interface to enable access to an Ethernet signal via fibre optic cables. These devices can be connected to the inputs of various Ethernet and GPON devices, and allow information to be sent/received by connecting to single-mode or multi-mode fibre optic cables or Ethernet cables. The advantages of using SFP modules include reduced space requirements, lower energy consumption and increased transmission distances. When to use which SFP? Depending on the devices to which they are connected, the transmission speed or the type of cable used, several media converter options are available. The compatibility between the SFPs and the various Ethernet and GPON devices is described below.
