

Item no.: 389530

INNOVATF2 - DVB-T Zimer antenna active up to K48 700 MHz

from **92,25 EUR**

Item no.: 389530
shipping weight: 0.20 kg
Manufacturer: Televes

Product Description

Omnidirectional and intelligent antenna, specially designed for the reception of DVB-T/T2 signals indoors. The active mode can be activated via a conventional smartphone power supply or via the USB port of the TV, which makes installation even easier (plug & play). The BOSS Tech System automatically adjusts the level of the received signal (either very high or very low) to always provide an optimal output level. The new design with TForce technology makes this active antenna even more versatile. Supports RED. Highlights - High dynamic range: Enables high-quality television reception in a variety of critical reception situations, from areas with very weak signals to installations with high reception levels. - Extension of the DVB-T reception range - More stable reception: signal fluctuations or fading do not affect the TV installation Features - Plug & play: quick and easy installation - Multiple power supply options: Via the TV's 5V USB port (USB-MicroUSB cable included) With a conventional USB power supply Power supply via the receiver (via the RF output) - Low power consumption in intelligent mode - The SAW filter (Surface Acoustic Wave) has been integrated to suppress the LTE frequency band (mobile phone interference radiation) - Unobtrusive and elegant design - Two operating modes: In intelligent mode (with antenna power supply), BOSS technology provides automatic control to correct signal fluctuations and maintain an optimum output signal In passive mode (without power supply), the signal is fed through - The electronics inside the antenna significantly reduce interference caused by the environment - As an omnidirectional antenna, it can be installed in both horizontal and vertical positions
