

Item no.: 389532

KGT862 - Galvanic isolator for BK systems

from **31,48 EUR**

Item no.: 389532
shipping weight: 0.20 kg
Manufacturer: Televes

Product Description

The galvanic isolator KGT862 is used for capacitive isolation of the inner conductor and the shielding to prevent equalising currents between different potentials. The isolator is inserted at the transfer point and connected to the building's equipotential bonding. It has 2 F connectors and an earthing terminal. Features- ABS plastic housing- Colour: white (RAL 9010) Specification- Frequency range MHz 5-1000- Pass-through attenuation dB 0.7- Return loss dB 20 ... 40- Dielectric strength inner conductor V 2000
