from **41,70 EUR**

Item no.: 389838
shipping weight: 0.60 kg
Manufacturer: Teles

Product Description

8U high enclosure for wall or perforated panel mounting. It has been designed to house panels and boards, mainly for the organisation of connections. The frame consists of a compact and handy structure that facilitates assembly and placement. It is a practical, cost-effective and versatile solution for infrastructures that do not require a complete rack and significantly reduces the space required for installation. The usual application of the frame is to accommodate 10" to 19" panels, but its two-part, modular format allows the width of the rack to be customised as required. The housing is provided with two small holes at both ends for installation in perforated panels. There is also a larger central hole at each end of the base for wall mounting. Dimensions (H x D): 370mm x 103mm Highlights- High load capacity: made of 1.5 mm thick steel- Wall or perforated panel mounting- Compact design: optimises space requirements and facilitates installation- Black colour (RAL 9005)- The total mounting capacity is 8U- With 4 screws and 4 nylon plugs for wall mounting and 4 screws for perforated panel mounting
