

Item no.: 389600

KROK25RK65 - BK amplifier 25 dB, RK 5-65 MHz PST equaliser

from **56,33 EUR**

Item no.: 389600
shipping weight: 0.30 kg
Manufacturer: Televes

Product Description

House connection amplifier with 1 output for equalising cable and distribution attenuation in multimedia-capable CATV/BK house networks. Amplifies and equalises the terrestrial frequency range and provides a passive return channel to enable communication between the subscriber modem and the operator. Its extended bandwidth in the forward path (88 MHz-1006 MHz) makes the amplifier compatible with DOCSIS 3.0. Highlights- Forward channel up to 1 GHz (DOCSIS 3.0)- Passive return channel 5-65 MHz- Unobtrusive design and compact dimensions- Powerful switching power supply: saves up to 40% compared to conventional amplifiers- Fully automated production under the strictest quality controls Features- Adjustable rotary control for level and equaliser, protected by a hinged cover- Wall mounting with screws- F-connectors
