### Product Description

Multi-switch with 17 inputs (1 x terrestrial and 16 x SAT) and 32 subscriber outputs. Very flexible: Can be used as a single or cascade switch thanks to switchable terminating resistors. Highlights- Attenuation switch 10dB for the subscribers (ON = LG / OFF = HG) for the SAT signal- Remote power supply with VL- DC feed-through between inputs and cascade outputs- Reverse channel compatible for CoaxData systems- European quality and design, 100% manufactured and tested at Teledes Features- Very compact design- Cast housing developed and manufactured at Teledes- Inputs and loop-through outputs colour-coded- Switching between cascade and single switch (terminating resistors can be added)- 12 V power supply- Low power consumption, therefore economical operation Specification- Number of inputs 17- Number of cascade outputs 17- Number of subscriber outputs 32- Frequency range TERR.
