NT12FSK - Remote power supply 12V800mA, Bluetooth

from **70,80 EUR**

Item no.: 389537
shipping weight: 0.40 kg
Manufacturer: Televes

Product Description

12V power supply unit (800mA) for home use, which is inserted into the installation to supply an intelligent SmartKom amplifier. The device is powered via the coaxial cable of the TV input and allows the signal to pass through at the output. It also has a second input for mixing satellite signals so that a complete TV distribution can be transmitted via a single coaxial cable connected to the output connector of the power supply unit. This power supply unit has been specially designed for installation with a SmartKom intelligent amplifier, as it has a Bluetooth® antenna that allows wireless programming of the SmartKom via a smartphone or tablet using the ASuite application. The power supply also has a button that performs the SmartKom's auto-programming function, allowing the amplifier to programme and set itself. Highlights- Bluetooth® antenna for wireless configuration of the SmartKom amplifier via a smartphone or tablet (ASuite app)- Integrated auto-programming button so that it is not necessary to physically go to the SmartKom to carry out programming- LED indicator that shows both the setting and programming status- Fully automated production subject to the strictest quality controls Features- Powerful switching power supply: Saves up to 40% on power consumption- Unobtrusive visual design and small size- F connectors- Can be wall-mounted with screws
