KF548C38BB-8 - FURY Beast 8 GB DDR5 4800 MHz, 1 Modul, low profile heatsink

from **32,21 EUR**

Item no.: 350069
shipping weight: 0.10 kg
Manufacturer: Kingston

Product Description

RAM D5 4800 8GB C38 FURY Beast Black

Kingston FURY™ Beast DDR5 brings the latest technology to next-generation gaming platforms. For a further boost in speed, capacity and reliability, DDR5 has a whole arsenal of enhanced features, including On-Die ECC (ODECC) for improved stability at extreme speeds, dual 32bit sub-channels for greater efficiency and a module power management integrated circuit (PMIC) that delivers power where it's needed most.

Superior advances in speed with the doubling of banks from 16 to 32 as well as the doubling of burst length from 8 to 16 take DDR5 memory, your gaming experience and your overall system applications to the next level of performance.

Whether you're pushing the limits when gaming at extreme settings, live streaming in 4K+, or doing big animations and 3D rendering, Kingston FURY Beast DDR5 the memory is the necessary boost that seamlessly blends style and performance.

It also utilises Intel® XMP 3.0, a new overclocking specification that includes two customisable profiles for speeds and timings.

Total memory capacity: 8GB (1x8GB)

Memory profile: 4800MT/s 38-38-38 1.1V

Higher performance from 4800MT/s

Improved stability for overclocking

More efficiency

Intel® XMP 3.0 Ready and Certified

Tested by the world's leading motherboard manufacturers¹

Plug-and-play at 4800MT/s

Low-profile heatsink design

- Frequencies: 4800MT/s
- Latencies : CL38
- Voltage : 1.1V
- Operating temperatures : 0 to 85°C
- Dimensions : 133.35 mm x 34.9 mm x 6.62 mm
