Product Description

Fibre optic junction box that serves as a separation and test point in a communication infrastructure and includes a keystone module and a simplex F.O. adapter "SC/APC" socket with internal bezel. The design allows the fibre optic to be installed on the wall so that no construction work is required. The optical termination unit provides protection against scratches and knocks, both for the internal elements and for the connector and cable, as they are positioned parallel to the wall. This also means a reduction in the space required for the connection, resulting in a more discreet appearance in the socket. Highlights- Standard dimensions, making it compatible with all conventional RJ45 covers- Simplex F.O. adapter "SC/APC" socket included in the scope of delivery- F.O. adapter with internal shutter: blocks the cable from entering the socket. Adapter with internal shutter: automatically blocks the passage of light when the plug is removed, ensuring eye protection- Outer housing made of white ABS- Inner keystone module made of PVC plastic- Special area for device labelling Physical data- Net weight:112g- Gross weight:145g- Width:59mm- Height:28mm- Depth:36mm- Main product weight:112g
