from **11,80 EUR**

Item no.: 389911
shipping weight: 0.10 kg
Manufacturer: Teledesic

Product Description

Patch cable convertible to pigtail SC/APC, singlemode (SM), LSFH Indoor cableSingle-mode (SM) fibre optic patch cable that is pre-assembled with SC/APC connectors at both ends. It can be converted into a pigtail and offers the option of customising its functionality according to requirements. It is used as standard for connecting optical devices. In addition, the patch cable can be split in half to obtain two pigtails with a single connected end, allowing the other end to be fused with an unconnected fibre cable. The 900µm sleeve is of the LSFH type and is recommended for indoor use. The cable is fitted with a short sleeve at one end, which facilitates installation in flush-mounted junction boxes and avoids attenuation increases due to unwanted bending. In addition, the short sleeve makes it easier to insert the patch cable into the empty conduits, reduces the space required for the connection and the bending radius is smaller. Supplied in boxes of 25 units. Item no. OSCAPC2 Product data- Ref. no.: 232602- EAN13: 8424450185902 Highlights-Glass fibre type ITU-T G.657.A2-LSFH jacket, white-SC/APC connectors-2m long
