from **96,89 EUR**

Item no.: 389564
shipping weight: 0.10 kg
Manufacturer: Teledes

Product Description

The UGF13-1 is a remote-supply-compatible combined arrester with F connection for 75 Ohm SAT and BK systems. The arrester fulfils the increased shielding requirements of class A in accordance with EN 50083-2. The combined arrester with integrated measuring output consists of a lightning current arrester and surge arrester and is suitable for space-saving installation in all common TV and SAT applications. Highlights: - Highest discharge capacity for coaxial systems - Low protection level also suitable for terminal device protection Features: - Long-term resistant contact materials - Suitable for DVB-C/T2/S/S2 - Suitable for return path - Integrated measuring output
