Product Description

Ethernet switch L2, unmanaged 5 ports, 10/100/1000Mbps Unmanaged Layer 2 switch, with 5 Gigabit Ethernet ports up to 1 Gbps. This plug & play device is characterised by simple operation without configuration effort. Suitable for multiple applications, specially designed for small networks that do not require many ports. Highlights- Compatible with IEEE 802.3 (10Base-T), IEEE 802.3u (100Base-TX), IEEE 802.3ab (1000Base-T), IEEE 802.3x (Flow Control) standards- Plug & Play: Quick and easy installation- Metal housing in a professional design that offers better heat dissipation and more stability- Supports 8K MAC address tables- Compatible with CSMA/CD protocols- LED indicators- Small housing- Power supply unit included Good to know Which switch is the right one? Depending on the various applications and configuration requirements, there are the following versions in the range: unmanaged switches and managed switches. An unmanaged switch is a plug-and-play device that enables various devices to be connected immediately via cable without having to make any prior adjustments to the configuration. A managed switch, on the other hand, offers a range of advanced configuration options and functions for detailed network configuration at layer 2 level. It also allows the configuration to be customised to the needs of the network, to monitor performance and to control what happens to the connected devices.
